- Compatible with API and GraphQL

Ultimate Guide for Magento 2 SizeChart

Introducing Magento 2 SizeChart extension which allows you to create and display size charts for products. This is particularly useful for online stores that sell apparel, footwear, or any items where sizing is important.

- Manage SizeChart: you can add a size chart for products.
 - Add SizeChart: Easily add Multiple Sizes, hips, waist, and bust to the chart.
 - Add Dynamic content for the size chart.
 - Manage from the Product page: The size chart offers a workflow for adding charts like (Clothes, Footwear) and also directly assigning to size chart to the product page.
 - Customer Can Convert bust, waist, and hip to Centimeters and inches.
-

How to install the extension

1. Upload via ZIP/Archive

- Back up your store's database and web directory
 - Download the extension zip file and extract the zip file
 - Transfer the **app** folder into the **Magento2 root** directory on the server
 - Enable maintenance mode **php bin/magento maintenance:enable**
 - Run the command **php bin/magento module:enable MageINIC_Core MageINIC_SizeChart**
 - Run the command **php bin/magento setup:upgrade** to install the extension
 - Run the command **php bin/magento cache:clean** to clean the cache
 - Disable maintenance mode **php bin/magento maintenance:disable**
 - Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
-

26	135.9	119.4	144.8

Table Structure of size,bust,waist,hip

*The following size recommendation is based on the current measurements.The final responsibility on choosing a size is the customers.

Ok

Note

- You need to set the same number of counts (bust, waist, hip) as per Sizes.
- You need to select Sizechart Attribute value from a particular Product to show Sizechart on the front side.
